

SAMVEDNA – CARE MODEL & PRICING TRANSITION PLAN

Purpose:

Build a system-led clinic model that reduces founder dependency, shifts case ownership to assistant doctors, optimizes follow-ups to bi-monthly, and drives middle-plan adoption—without any perceived drop in quality.

Horizon: 90 days rollout + 6 months stabilization

Samvedna Care Plans

Structured, Evidence-Led Homeopathy for Autism, ADHD & Neurodevelopmental Challenges

Every child progresses differently — but the care they receive should always be predictable, structured, and led by a trained medical team.

Our plans are designed to give your child the right level of support, reduce your stress as a parent, and provide consistent, measurable improvement.

1. Starter Plan (2 Months)

₹14,999

A safe beginning for families who want to understand how Samvedna's structured care works before committing long-term.

What's Included:

- Medicines for 2 months
- 1 Bi-Monthly Review (60-day review)
- Assessment & treatment planning by Case Doctor
- Written instructions for medicines & routines
- WhatsApp support (response within 48 hours)

Best For:

Parents exploring treatment options

Families wanting to understand responsiveness before long-term treatment

2. Standard Plan (6 Months)

₹39,999

Our Most Preferred Plan — Balanced, Structured & Doctor-Led

This plan offers the best combination of medical support, structured monitoring, and long-term clarity.

Designed for parents who want predictable progress with reduced stress.

What's Included:

- Medicines for 6 months
- Bi-Monthly Follow-Ups (every 2 months) — 3 structured reviews
- Day-to-day care by Case Doctor
- Senior Doctor Review every 2 months
- Progress Dashboard every 60 days
- Parent counselling sessions
- Coordination with therapists (1 call/review cycle)
- WhatsApp support (response within 24–36 hours)
- Priority follow-up booking

Why Most Families Choose This:

- Two-doctor oversight = strong, safe and structured care
- Reduced clinic visits = less pressure on child & parents
- Clear 60-day improvement cycles
- Excellent value for long-term conditions (Autism, ADHD, Developmental Delays)

3. Premium Founder-Supervised Plan (6 Months)

₹54,999

For families who want the highest level of supervision with periodic founder review woven into the care plan.

What's Included:

- Medicines for 6 months
- Monthly Follow-Ups
- Day-to-day care by Case Doctor
- Senior Doctor Monitoring every month
- Founder Review once every 3 months
- Same-day WhatsApp response

Ideal For:

- Severe or complex cases
- Families seeking higher-intensity guidance
- Parents who prefer founder-involved oversight.

1) Strategic Objectives (What success looks like)

1. **Clinical** – Bi-monthly (every ~60 days) follow-ups as the norm; escalations only to senior/founder.
2. **Commercial** – Middle plan (₹39,999 / 6 months) achieves 60–70% uptake; premium plan capped at ₹54,999 ~10–15% uptake; starter ~20–25%.
3. **Operational** – Case-doctor-led delivery with senior doctor periodic review; founder only for complex escalation and quarterly strategy.
4. **Experience** – Parents feel more structured and thoughtful care, not less. Progress dashboards replace frequent check-ins.
5. **Governance** – SOPs, CMS completeness ≥95%, review boards, and clear KPIs tracked monthly.

2) New Pricing Architecture (Good–Better–Best)

Psychology: Design the middle plan as the “value sweet spot” and make founder involvement clearly “premium oversight”—not routine.

2.1 Plan Matrix

Plan	Duration	Follow-ups	Who Handles	What's Included	Price (₹)	Target Mix
Starter (Trial)	2 months	1 (bi-monthly)	Case Doctor	Medicines, written instructions, WhatsApp (≤48h)	14,999	20–25%
Standard (Most Preferred)	6 months	Every 2 months (3 sessions)	Case + Senior	Medicines, 3 structured reviews, progress dashboard, therapy coordination (1 call/cycle), priority slots, WhatsApp (24–36h)	39,999	60–70%
Premium (Founder–Supervised)	6 months	Monthly, founder review quarterly	Case + Senior + Founder review	All above + same-day support, custom tweaks, founder Q&A webinar access	54,999	10–15%

Positioning Lines

- Starter: “Safe start to experience structured Samvedna care.”
- Standard: “Balanced, evidence-led care with two-doctor oversight.”
- Premium: “High-intensity supervision with founder review.”

3) Follow-Up Protocol (from 15 days → bi-monthly)

3.1 Clinical Rationale (patient-facing narrative)

“Neurodevelopmental changes typically consolidate over 6–8 weeks. Bi-monthly reviews allow the medicine to work, reduce parental anxiety from over-monitoring, and enable deeper, evidence-based consultations.”

3.2 Operational Protocol

- **Checkpoints:** Every ~15 days (touchpoint tick) for adherence checks (non-consult), formal reviews at 60-day intervals.
- **Who:**
 - **Case Doctor** – day-to-day case management, 15-day adherence checks, review prep.
 - **Senior Doctor** – bi-monthly case review (structured).
 - **Founder** – escalation + quarterly strategy review in premium plan only.
- **Documentation:** CMS templates with 4 mandatory fields at every review: chief complaint, diagnosis code, protocol chosen, next-visit date.
- **Progress Dashboard:** Shared every 2 months with the parent.

(Note: I’ve already prepared an Excel “Follow-up Plan” with 15-day checkpoints & bi-monthly flags. If you want, I’ll embed this into a clinic pack.)

4) Roles & Responsibilities (R&R)

Role	Responsibilities	KPIs
Case Doctor (Primary)	History, protocol execution, 15-day adherence checks, parent counselling	CMS completeness $\geq 95\%$, adherence $\geq 85\%$, satisfaction $\geq 4.5/5$
Senior Doctor (Secondary)	60-day strategic review, validation of progress, protocol upgrade	Review closure within 48h, variance control, escalation quality
Founder (Clinical Architect)	Escalations, quarterly complex case board, clinical training	Escalations resolved ≤ 7 days, guidance notes, training cadence
Clinic Manager	Scheduling, parent communication, dashboard distribution	No-show rate $\leq 10\%$, turnaround on messages $\leq 24-36$ h

5) SOPs & Scripts (to remove “quality compromise” fear)

5.1 Parent Communication Script (during pricing transition)

“We’ve upgraded Samvedna’s care to a team-led model. Your Case Doctor manages day-to-day care, and a Senior Doctor assesses the case every 2 months. This gives you two medical minds on every review. The Founder personally reviews complex cases and leads the clinical boards.”

5.2 Bi-Monthly Review Script (short)

1. Review last 60 days’ dashboard
2. Explain response patterns (what improved / what plateaued)
3. Tweak protocol with rationale
4. Set next goals and habits
5. Confirm next review date and therapy coordination

5.3 Escalation Criteria (when to involve Founder)

- No measurable movement across two consecutive cycles
- Mixed clinical signals needing protocol innovation
- Multi-comorbidity complexity
- Parent anxiety unresolved despite structured counselling

6) Marketing & Sales Enablement (aligned to the new plans)

- **Website Pricing Section** – three cards with Standard tagged “Most Preferred”.
- **Lead Nurture** – WhatsApp templates:
 - **Starter** → “Try structured care for 60 days.”
 - **Standard** → “Most families choose this for balanced oversight.”
 - **Premium** → “Founder-led review for high-intensity support.”
- **Case Studies Library** – mapped by age & severity; present 1–2 matched cases at consideration.
- **Content** – Reels/shorts explaining why bi-monthly is smart and evidence-based; show progress dashboards and team-based care.
- **Sales Script** – “Two-doctor oversight” and predictable bi-monthly rhythm as benefits.

7) Expo & Lead Collection (single form, auto-segregated)

Form Title : “Tell Us How We Can Help You – Samvedna Expo Form”

Q1 (branching): Treatment vs Doctor/Partner → conditional sections.

Sheets: One master sheet with Lead Type column; saved filters for Parent Leads and Doctor Leads.

Immediate WhatsApp reply:

- Parent – assessment link + intro video
- Doctor – collaboration deck + schedule link

(I can share the live Google Form & QR codes on request.)

8) Execution Timeline (90-Day Rollout)

Weeks 1–2

- Announce new plan internally, train staff on scripts, update pricing page and brochures
- Lock CMS mandatory fields; activate bi-monthly review templates
- Start “two-doctor oversight” communication

Weeks 3–4

- Migrate active patients to the new cadence at next review
- Launch Standard Plan campaign (site + WhatsApp)
- Start progress dashboards

Month 2

- Weekly case board (10 cases) to normalize senior reviews
- Audit CMS compliance and adherence
- Track plan mix; adjust Standard Plan value copy

Month 3

- Publish first outcomes round-up (anonymized)
- Minor price messaging tests if Standard adoption <60%
- Debrief & stabilize

9) KPIs & Dashboards

Commercial

- Plan mix: Starter 20–25% | Standard 60–70% | Premium 10–15%
- Cancellation / refund rate
- Average revenue per patient (ARPP)

Clinical & Ops

- CMS completeness $\geq 95\%$
- Follow-up adherence $\geq 85\%$
- No-show $\leq 10\%$
- Escalation resolution ≤ 7 days
- Case doctor variance (outcome & satisfaction) $< 10\%$

Experience

- Parent NPS ≥ 60
- Review language shift toward “*Samvedna system*” vs individuals

10) Risk Log & Mitigations

Risk	Mitigation
Parents fear “less monitoring”	Educate on 6–8–week consolidation; dashboards; two-doctor oversight
Assistant doctor confidence variance	30–day micro–curriculum + weekly case board
Standard plan adoption $< 60\%$	Value stack enhancements (therapy sync, faster support SLA), refine copy
Founder re–insertion pressure	Clear escalation protocol; premium plan exists for those who insist
CMS discipline slips	Monthly audits; clinic scorecard; incentives tied to compliance
